ABSTRACT

This survey summarizes, in tabular form, the latest reports of year-round education activities in the United States as supplied by State and outlying district education agencies. Tables cover the period July 1, 1973 through February 1, 1974. Data reported include the number of operational programs and study/planning activities in each State, the number of students affected by programs in progress and those being planned, the number and types of operational programs and the distribution of students in these programs, the grade levels involved, the purpose of the program, extent of curriculum change, teacher contract effects, program evaluation status, and funding sources. Selected data are also compared with the 1972-73 survey. Data reported on individual programs and activities are given by State. In addition to providing the type of information cited above, individual activity data also reports the project name, the name of each school district and/or school, and the name and address of the superintendent and the project director. An indication is made as to which projects have available published materials that describe their activities. (Author/DN)

Foreword

Tables I through XI of this survey summarize the latest reports of year-round education activities in the United States as supplied by state and outlying district education agencies. They cover the period July 1, 1973 through February 1, 1974.

Individual activity data are given, by state, on pages 10 through 45.

As with any survey, proper credit must be given to those people who diligently secured and reported the needed information. They are responsible for the timeliness and usefulness of this document; responsibility for errors and omissions remains mine.

Bruce Campbell, Director
Extended School Year Programs

YEAR-ROUND EDUCATION IN THE UNITED STATES

1973-74

1. Total number of activities in feasibility study, planning, preimplementation, operation - 209. See Table I.
2. Number of states reporting activities - 37. See Table I.
3. Number of operational programs - 127. See Table I.
4. Number of states with operational programs - 24. See Table I.
5. Number of students affected by identified activities - 4,154,685. See Table II.
6. Number of students in operational programs - 1,786,36[illegible] See Table II.
7. Number of agencies that did not return survey - 3 (DC, OH, VT.) See Table I.
8. Number of activities per state - Table I.
9. Number and types of operational programs - Table III.
10. Number of programs abandoned - 1 (WA.)
11. Estimated distribution of pupils in operational programs - Table IV.
12. Grade levels - Table V.
13. Purpose of programs - Table VI.
14. Extent of curriculum change - Table VII.
15. Teacher contract effects - Table VIII.
16. Evaluation status - Table IX.
17. Funding sources - Table X.
18. Comparisons of selected data 1972-73 and 1973-74 - Table XI.
